

## Effort Enhancements for the Summer 2009 Term (2095)

### SYSTEM UPDATES

- Added a **Confirmation message after clicking the Agree** button- Displays Certified by Name and Date
- Added **Term Dates** to the Effort Cert page
- No longer sending **emails to employees in “terminated” status**, since they can't access the menu to electronically certify their effort. A Proxy Certifier will need to be assigned for these employees.
- **Expanded the text** of the individual's certification email notice to provide clearer explanation of the purpose and process to certify electronically
- Bridges **fixed the security problem** that required manual re-syncing of roles when the UF\_ET\_PROXY\_CERTIFIER role was added for an employee
- **Not requiring certification** for people with **0% total effort** (not sending them an email notice)
- **Allocation percentage** values in the body of Certification Page were **made darker** to improve visibility
- Added **Search Criteria** fields on Effort Certification-Admin page for **DeptID** and **Certification Status**
- Added activity **logic for new Funds**: 214-Clinical Trials and 231-235 for State Stimulus funding
- **Other Sponsored Activities** (OSA) will now be available to Academic (Exempt) employees for reporting effort on those awards, usually found in the HSC (i.e. CMS, Mother-Infant Care)

### RESOURCE UPDATES

- Provided an email list to the department effort reporter of **“who is terminated”** as a tool to help identify employees who may need a proxy certifier requested/assigned for the term
- Provided an email **list of HOUSE STAFF** to department effort reporters as a tool for requesting proxy certifiers prior to the term opening
- Modified the **Proxy Certifier Request form** to improve processing time
- (Under development) A new Enterprise Report of **Project Effort Report by PI** (shows who was paid directly from or loaned to the PI's projects and how that project effort was reported)
