

Chapter 16 – Internet Explorer 11 (IE11) Fix

If your browser freezes (selection boxes are greyed out), this is an IE11 browser issue.

Follow the instructions below to fix this issue. Go to...Tools>Compatibility View settings in your browser. Type **corcentric.com** in the “Add this website” box and click Add then close.

2. Trusted Sites

If you still do not see an invoice in MPS, add the following 3 URLs to your browser's trusted sites.

<https://dajaproduct.corcentric.com>

<https://cor360lb.corcentric.com>

<https://cor360.corcentric.com>

Go to...Tools>Internet Options in your browser and click on the "Security" tab. Then click on "Trusted sites" and the "Sites" button. Type in the addresses above in the "Add this website to the zone" window and click on Add and close once completed.
