

### **Wisepad 2.0/3.0 P2PE Credit Card Loaner Program**

- Processing fees: \$0.15/transaction plus processing fees and interchange (~1.5-3%).
- Works as card present (face to face) and card not present transactions (key entry).
- Wisepad connects to an iPhone or iPad via Bluetooth. iPad/iPhone must have a network connection (cellular). iPad or iPhone does not need to be a UF device.
- Accepts EMV cards (chip cards), NFC (Apple Pay, Google Pay, etc.).

### **Other Considerations**

- FedEx shipping fees for the device are charged to the department.
- Your department is financially responsible for the device if it is not returned in working order (lost, damaged, or stolen).
- Everyone handling the device and credit card transactions must complete TRM125 training via <https://mytraining-ufshands.sumtotal.host/>. For those unable to login directly to take the training, a guest account can be created following these instructions: [https://mytraining.hr.ufl.edu/portal/quick\\_reg/default.html](https://mytraining.hr.ufl.edu/portal/quick_reg/default.html)
- The iOS devices used with the Wisepad must connect to the internet via a cellular connection, not WIFI. WIFI connections for credit card transactions are not allowed by UF.
- The Wisepads and iOS devices with the Bluefin QuickSwipe accounts will be logged out, shutdown and kept in a secured location when not in use.
- You will ensure that the PeopleSoft/UF deposits based on the revenue from the event are made within 3 business days of the end of the event.
- You will send us the names and contact information of the individuals that will be making the sales and the subsequent deposits in the UF PeopleSoft system as soon as they are confirmed.
- Wisepad does not print receipts. Receipts are provided via email.
- The Wisepad does not facilitate signature authorizations. The customer can use the iOS device to sign. Signature authorizations are not required.
